NOTES

- 1 - The channel attenuation is the sum of all link attenuations and attenuation values for all passive components including splitters, couplers and jumpers.
- 2 - Subject to 20km differential fiber distance limit for conventional ITU-T G.984 GPON systems, and subject to 40 km differential fiber distance limit for the ITU-T G.984.7-compliant systems.
- 3 - Supportable fiber distance can be increased up to 60 km, subject to 40km differential distance limit.
