

# GPM-8320/8330 Specifications

The specifications apply when warmed up for at least 30 minutes and operates under the slow rate & 18~28 °C.

#### Input

| input                   |   |   |   |  |  |
|-------------------------|---|---|---|--|--|
| Item                    | Specifications  |   |   |  |  |
| Innut tuno              | Voltage Floating input through resistive voltage divider  |   |   |  |  |
| Input type              | Current   | Floating input thro                               | ough shunt  |  |  |
|                         | Voltage   | Voltage 15V, 30V, 60V, 150V, 300V, 600V and 1000V |   |  |  |
|                         | Current   |   |   |  |  |
| Measure range           | Direct input 0.5A, 1A, 2A, 5A, 1  |   | .0A and 20A   |  |  |
|                         | Sensor input  | EX1: 2.5 V, 5 V, 10                               | V   |  |  |
|                         |   | EX2: 50 mV, 100 m                                 | nV, 200 mV, 500 mV, 1 V, 2 V                                |  |  |
|                         | Voltage   |   | Input resistance: approach 2 MΩ                             |  |  |
|                         | Current   |   |   |  |  |
| Input impedance         | Direct input ra   | nge 0.5A ~ 20A                                    | Input resistance: approach 5 mΩ                             |  |  |
| input impedance         | Sensor input  |   |   |  |  |
|                         | Input range 2.5V ~ 10V (EX1)  |   | Input resistance: approach 100 kΩ                           |  |  |
|                         | Input range 50mV ~ 2V (EX2)   |   | Input resistance: approach 20 kΩ                            |  |  |
|                         | Voltage   |   | peak value of 1.5kV or RMS value of 1kV, whichever is less  |  |  |
| Continuous maximum      | Current   |   |   |  |  |
| allowable input         | Direct input range 0.5A ~ 20A   |   | peak value of 100A or RMS value of 30A, whichever is less   |  |  |
|                         | Sensor input  |   | peak value less than or equal to 5 times of the rated range |  |  |
| Input bandwidth         | DC, 0.1 Hz ~ 10   | 00kHz   |   |  |  |
| Continuous maximum      | 600 Vrms, CAT Ⅱ   |   |   |  |  |
| Common-mode voltage     |   |   |   |  |  |
| Line filter             | select OFF or ON (cut off frequency of 500 Hz)  |   |   |  |  |
| Frequency filter        | select OFF or ON (cut off frequency of 500 Hz)  |   |   |  |  |
|                         | Simultaneous conversion voltage and current inputs  |   |   |  |  |
| A/D converter           | Resolution 16bits   |   |   |  |  |
|                         | Maximum conversion rate Approx. 300kHz  |   |   |  |  |
| Display update interval | When the data update interval is 100 ms the numeric display 10 items display update interval is 200 ms. |   |   |  |  |

| When the data update interval is 100 ms or 250ms and the numeric value display is set to |
|--|
| Matrix or ALL Items display update interval is 500 ms.                                   |
| The waveform display update intervals are approximately 1s.                              |

#### **Voltage and Current Accuracy**

## **Voltage, Current and Active Power Measurements**

| Item                   | Specifications   |  |  |  |
|------------------------|--|--|--|--|
| Measurement method     | Digital sampling method  |  |  |  |
| Crest factor           | 3 or 6 (6A)  |  |  |  |
| Wiring system          | Single-phase, two-wire (1 P2 W)  |  |  |  |
| Range select           | Select manual or auto ranging  |  |  |  |
|                        | Auto-range increase  |  |  |  |
|                        | The range is upped when any of the following conditions is met.  |  |  |  |
|                        | Crest factor 3   | Vrms or Irms exceeds 130% of the currently set measurement range.    |  |  |
|                        |  | Vpk, Ipk value of the input signal exceeds 300% of the currently set |  |  |
|                        |  | measurement range.   |  |  |
|                        | Crest factor 6   | Vrms or Irms exceeds 130% of the currently set measurement range.    |  |  |
|                        |  | Vpk, Ipk value of the input signal exceeds 600% of the currently set |  |  |
|                        |  | measurement range.   |  |  |
|                        | Crest factor 6A  | Vrms or Irms exceeds 260% of the currently set measurement range.    |  |  |
|                        |  | Vpk, Ipk value of the input signal exceeds 600% of the currently set |  |  |
|                        | measurement range.   |  |  |  |
| Auto range             | Auto-range decline   |  |  |  |
|                        | The range is downed when all of the following conditions are met.  |  |  |  |
|                        | Crest factor 3   | Vrms or Irms is less than or equal to 30% of the measurement range.  |  |  |
|                        |  | Vrms or Irms is less than or equal to 125% of the next lower         |  |  |
|                        |  | measurement range.   |  |  |
|                        |  | Vpk, lpk value of the input signal exceeds 300% of the currently set |  |  |
|                        |  | measurement range.   |  |  |
|                        | Crest factor 6 or  |  |  |  |
|                        |  | Vrms or Irms is less than or equal to 125% of the next lower         |  |  |

|------------------------|--|--|--|--|
| Item                   | Specifications   |  |  |  |
| Measurement item       | Voltage and current  |  |  |  |
|                        | Data update interval   | Measurement Frequency Range  |  |  |
|                        | 0.1 s  | 20 Hz ≤ f ≤ 100 kHz  |  |  |
|                        | 0.25 s   | 10 Hz ≤ f ≤ 100 kHz  |  |  |
|                        | 0.5 s  | 5 Hz ≤ f ≤ 100 kHz   |  |  |
|                        | 1 s  | 2.0 Hz ≤ f ≤ 100 kHz   |  |  |
|                        | 2 s  | 1.0 Hz ≤ f ≤ 100 kHz   |  |  |
|                        | 5 s  | 0.5 Hz ≤ f ≤ 100 kHz   |  |  |
| Measurement frequency  | 10 s   | 0.2 Hz ≤ f ≤ 100 kHz   |  |  |
| range                  | 20 s   | 0.1 Hz ≤ f ≤ 100 kHz   |  |  |
|                        | Auto ( * )   | 0.1 Hz ≤ f ≤ 100 kHz   |  |  |
|                        | ( * ) Limit of the measurement lower limit frequency by the Timeout setting              |  |  |  |
|                        | Timeout  | lower limit frequency  |  |  |
|                        | 1 s  | 2.0 Hz   |  |  |
|                        | 5 s  | 0.5 Hz   |  |  |
|                        | 10 s   | 0.2 Hz   |  |  |
|                        | 20 s   | 0.1 Hz   |  |  |
| Measurement range      | Auto switching among six types: 100mHz, 1 Hz, 10 Hz, 100 Hz, 1 kHz, 10 kHz, and 100 kHz. |  |  |  |
| Frequency filter       | Select OFF or ON (cut off frequency of 500 Hz)   |  |  |  |
|                        | Requirements   | When the input signal level is 30% or more of the measurement        |  |  |
| Accuracy               |  | range If the crest factor is set to 3.                               |  |  |
|                        |  | (60% or more if the crest factor is set to 6 or 6A)                  |  |  |
|                        |  | • Frequency filter is ON when measuring voltage or current of 200 Hz |  |  |
|                        |  | or less.   |  |  |
|                        | ± (0.06% of reading)   |  |  |  |

## Integration

| Item     | Specifications   |  |
|----------|--|--|
| Mode     | Select manual integration mode, standard integration mode, or repetitive integration mode. |  |
| Timer    | Automatically stop integration by setting a timer.   |  |
|          | Selectable range: 0 hours 00 minutes 00 seconds to 9999 hours 59 minutes 59 seconds        |  |
| Accuracy | ±(Power accuracy (or current accuracy) + 0.1% of reading) (fixed range)                    |  |

| Range setting  | Auto range or fixed range is available for Integration                                   |
|----------------|--|
| Timer accuracy | ±0.02%   |
| Remote control | Start, stop and reset operations are available using an external remote signal. (option) |

#### D/A Output (Options)

|                         | I   |  |  |
|-------------------------|---|--|--|
| Item                    | Specifications  |  |  |
| Output voltage          | ±5 V FS (approach ±7.5 V maximum) against each rated value.                               |  |  |
| Number of output        | 12  |  |  |
| channels                |   |  |  |
| Output items            | Set for each channel : V, I, P, VA, VAR, PF, DEG, VHZ, IHZ, Vpk, Ipk, WP, WP±, q, q±, Off |  |  |
| Accuracy                | ±(accuracy of each measurement item + 0.2% of FS)(FS = 5 V)                               |  |  |
| D/A conversion          | 16 bits   |  |  |
| resolution              |   |  |  |
| Minimum load            | 100 kΩ  |  |  |
|                         | Same as the data update interval.   |  |  |
| Update Interval         | In the case of Auto Update Rate, update interval is equal to signal interval. More than   |  |  |
|                         | 100ms.  |  |  |
| Temperature coefficient | ±0.05%/°C of FS   |  |  |

#### Remote Control Input/Output Signal (Options)

| Item                  | Specifications                                     |  |
|-----------------------|--|--|
| Remote control input  | EXT HOLD, EXT TRIG, EXT START, EXT STOP, EXT RESET |  |
| signal                |  |  |
| Remote control output | INTEG BUSY   |  |
| signal                |  |  |
| I/O level             | TTL  |  |
| I/O logic format      | Negative logic, Falling edge                       |  |

<sup>\* 50</sup>Hz/60Hz Compliant IEC61000-4-7 (update rate must be > 0.5s)

\* Harmonic calculation: FFT method in which FFT data length is divided into 2 types: 1024 and 4096.

<sup>\*</sup> FFT data length automatically switches in accord with the Frequency and Update Rate of measured signal.

#### **Digital IO Signal (Options)**

| Item                      | Specifications         |
|---------------------------|------------------------|
| I/O control output signal | OUT1, OUT2, OUT3, OUT4 |
| I/O level                 | TTL                    |
| I/O sink current          | Max 100mA (per/ch)     |

<sup>\*</sup> Q (VAR), S (VA),  $\lambda$  (PF) and  $\Phi$  (DEG) are originated from the measured values including voltage, current and active power which go through computation process. In respect to distorted signal input, accordingly, the value acquired from other instruments, which employ different methods, may differ from that acquired from GPM-8310 unit.

#### General

| Display             | 5" TFT LCD  |
|---------------------|---|
| Interfaces          | RS-232C, USB host/device, LAN                               |
| Power Source        | AC 100-240V, 50-60Hz  |
| Power Consumption   | 35VA max.   |
| Dimensions & Weight | 220(W) x 132(H) x 402.5(D) mm (w/t bumpers), Approx. 3.85kg |
